Product : e-Ration

e-Ration is the system for ration card system, which is part of the Internet of Things that is IOT. We are using hardware and software Fingerprint scanner, Retina scanner and barcode scanner. Our target audience is poor people who will get food at the low cost and also the government we are giving our product.

Startup:

e-Ration Pvt. Ltd. was established in the year 2020-2021 by the promoters Simren dubey, Harshad Dandvekar and Pratik Katariya at SP-TBI of Sardar Patel Institute of Technology, Andheri (West), Mumbai in 2020.

Executive summary:

e-Ration is a company which will help poor people to get their ration easily by modifying current ration card system.Our main goal is to make the system uninterrupted and smooth so that people can get benefit from this system.e-Ration system is a Private Company, working along with the government to make a advance Ration Card System. This System will assure smooth and uninterrupted supply of food to the customer, without any chaos. The Current Loophole in the system will be eradicated and will be replaced by the new technology which will be easy to use and understand. The system will be replaced by the new hardware and new barcode based e-Ration card system that will store the data of the person. Hardware included for authentication are Fingerprint Scanner, Retina Eye Scanner .
